特异性

This antibody recognises NF-kB p65. For WB, this antibody is unsuitable for detecting NF-KB p65 in mouse tissue lysates. The expression of NF-KB p65 is increased by lipopolysaccharides treatment reported by PMID: 18036230. Although some papers support the expression of NF-κB p65 in mouse tissue (PMID: 21479220 and 20008488), This antibody cannot detect band of interest in these mouse tissue.
