特异性

RB9A37012888 is generally used to complement anti-CD20 especially for mature B-cell lymphomas after treatment with anti-CD20. RB9A37012888 will stain many of the same lymphomas as anti-CD20, but also is more likely to stain B-lymphoblastic lymphoma/leukemia than is anti-CD20. Anti-CD79a also stains more cases of plasma cell myeloma and occasionally some types of endothelial cells as well.
