特异性

RB9A37015758 is useful in differentiating squamous cell carcinomas from poorly differentiated epithelial tumors. RB9A37015758 is one of the specific basal markers for distinguishing between basal and non-basal subtypes of breast carcinomas. RB9A37015758 is also a good marker for differentiation of intraductal from invasive salivary duct carcinoma by the positive staining of basal cells surrounding the in-situ neoplasm as well as for differentiation of benign prostate from prostate carcinoma. Furthermore, RB9A37015758 has been useful in separating oncocytic tumors of the kidney from its renal mimics, and in identifying metaplastic carcinomas of the breast.
