反应性数据

应用	应用代码	物种	验证状态	推荐稀释	备注
Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)	IHCP	Human	已验证	1/2000	When using the Leica Bond system, heat-mediated antigen retrieval (Tris-EDTA buffer, pH 9.0, Epitope Retrieval Solution 2) may not yield a detectable signal. Customer feedback indicates that enzyme-based retrieval can produce positive results on the Leica Bond system. If no signal is observed, consider enzyme retrieval or the manual method as alternatives. Perform heat-mediated antigen retrieval with Tris/EDTA buffer pH 9.0 before commencing with IHC staining protocol.
Western blot	WB	Human	已验证	1/1000	-
