反应性数据

应用	应用代码	物种	验证状态	推荐稀释	备注
Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)	IHCP	Human	已验证	1/4000	-
Western blot	WB	Human	已验证	1/10000	Detection of endogenous expression of AXL in WB will need optimization. Under our experimental conditions we could not detect endogenous AXL in human cell and tissue lysates. RB9A37017303 exhibits low sensitivity in western blot. It is recommended to use RB9A37033066 or RB9A37016258 as alternatives or to optimize experimental conditions by increasing the sample loading amount, using a lower antibody dilution ratio, and employing femtogram-level sensitivity substrates.
