特异性

In our lab we observe staining in multiple tissues (spleen, lung, kidney etc.) in IHC-P with RB9A37015054, but a lack of staining on mouse brain. We have received feedback from other researchers, that they also do not see staining in mouse brain with this antibody. Therefore we do not recommend using this reagent, for work on mouse brain, in IHC-P. For further information on this please contact our Technical Support team who will be happy to help.
