特异性

The immunogen design for RB9A37057486 is shown to cross-react with both PGC1 alpha (ID: 124782 and Swissprot Q9UBK2) and PGC1 beta (ID: 240776 and SwissProt Q86YN6). From Jan 2024, QC testing of replenishment batches of this polyclonal changed. All tested and expected application and reactive species combinations are still covered by our Abcam product promise. However, we no longer test all applications. For more information on a specific batch, please contact our Scientific Support who will be happy to help.
