Vanucizumab ELISA试剂盒(靶标：)

Vanucizumab ELISA Kit

货号：RB9T37014597

在您使用本产品前请认真阅读说明书，这对您顺利完成实验很有帮助。

产品编码
RB9T37014597

中文名称
Vanucizumab ELISA试剂盒(靶标：)

英文名称
Vanucizumab ELISA Kit

应用
ELISA

登录号
P15692 & O15123

检测方法
Colorimetric

灵敏度
0.156 μg/ml

检测范围
0.31-5 μg/mL

回收率
80-120%

样本类型
Plasma, Serum

检测类型

Quantitative

背景信息

Vanucizumab (RG7221) is an experimental humanized monoclonal antibody (mAb) designed for the treatment of cancer. Vanucizumab is a bi-specific mAb composed of two different heavy chains and two different light chains. One arm of the antibody binds Angiopoietin-2 (Ang2) and the other is based on bevacizumab (Avastin), binding vascular endothelial growth factor A (VEGF-A). The antibody is designed to inhibit both VEGF-A and Ang2 simultaneously to offer superior clinical benefit compared to VEGF-A inhibition alone. This drug was developed by Genentech/Roche. On 12 Mar 2018, Roche completes a phase I trial in solid tumors (combination therapy, late-stage disease, metastatic disease, second-line therapy or greater) in Spain, France, and Belgium.

稳定性和储存

The stability of ELISA kit is determined by the loss rate of activity. The loss rate of this kit is less than 10% prior to the expiration date under appropriate storage condition.

运输条件

2-8 ℃

For Research Use Only.
