Tisotumab ELISA试剂盒(靶标：)

Tisotumab ELISA Kit

货号：RB9T37014661

在您使用本产品前请认真阅读说明书，这对您顺利完成实验很有帮助。

产品编码
RB9T37014661

中文名称
Tisotumab ELISA试剂盒(靶标：)

英文名称
Tisotumab ELISA Kit

应用
ELISA

登录号
P13726

检测方法
Colorimetric

灵敏度
0.156 μg/ml

检测范围
0.31-5 μg/mL

回收率
80-120%

样本类型
Plasma, Serum

检测类型

Quantitative

背景信息

Tisotumab vedotin, also known as HuMax-TF, HuMax®-TF-ADC or TF-011-MMAE, is an antibody-drug conjugate (ADC) targeted to tissue factor (TF), a protein involved in tumor signaling and angiogenesis. Tisotumab vedotin includes an antibody targeting TF conjugated with monomethyl auristatin E (MMAE) via a cleavable maleimidocaproyl-valyl-citrullinyl-p-aminobenzyloxycarbonyl (mc-val-cit-PABC) type linker. Based on its high expression on many solid tumors (including ovarian, prostate, bladder, esophageal, endometrial and lung) and its rapid internalization, TF is considered a suitable target for antibody-drug conjugates. In pre-clinical trials tisotumab vedotin has shown strong ability to bind to TF and inhibit tumor growth. Genmab and Seattle Genetics are jointly developing tisotumab vedotin. In a Phase IIa study, preliminary data demonstrated a manageable safety profile and encouraging efficacy (ORR 37%) in relapsed, recurrent or metastatic cervical cancer.

HuMax-TF-ADC, TF-011-MMAE, HuMax-TF, 1418628-81-5

稳定性和储存

The stability of ELISA kit is determined by the loss rate of activity. The loss rate of this kit is less than 10% prior to the expiration date under appropriate storage condition.

运输条件

2-8 ℃

For Research Use Only.
