背景信息

Murlentamab (3C23K; GM102) is a humanized anti-AMHRII antibody. AMHRII is the anti-Müllerian hormone receptor. Murlentama significantly promotes macrophage-mediated antibody-dependent cell-mediated cytotoxicity (ADCC). Murlentama stimulates pro-inflammatory and anti-tumor internal environment, recruits and activates T cells. Murlentama suppresses tumors growth by inducing naïve macrophage orientation and promoting tumor-associated macrophage (TAM) reprogramming.
