背景信息

Sacituzumab is a humanized IgG1 monoclonal antibody targeting Trophoblast cell surface antigen 2 (TROP2). Sacituzumab demonstrates a lack of antitumor effects alone and does not inhibit the function of TROP-2 during tumor metastasis, binding to the linear epitopes of TROP-2 protein. Sacituzumab is used for the synthesis of antibody-drug conjugates (ADC) drugs. Antibody-drug conjugates with sacituzumab (sacituzumab govitecan) targeting TROP-2 have been approved for the field of triple-negative breast cancer.
