沃塞妥珠单抗ELISA检测试剂盒

Vorsetuzumab ELISA Kit

货号：RB9T37017317

在您使用本产品前请认真阅读说明书，这对您顺利完成实验很有帮助。

产品编码
RB9T37017317

中文名称
沃塞妥珠单抗ELISA检测试剂盒

英文名称
Vorsetuzumab ELISA Kit

应用
ELISA

登录号
P32970

靶标
沃塞妥珠单抗酶联免疫检测试剂盒

检测方法
Colorimetric

灵敏度
0.156 μg/ml

检测范围
0.31-5 μg/mL

回收率
80-120%

样本类型
Plasma, Serum

检测类型
Quantitative

背景信息

Vorsetuzumab mafodotin, also known as SGN-75, is a novel antibody conjugated with a cytotoxic molecule, auristatin analogue monomethyl auristatin phenylalanine (MMAF). The antibody part of vorsetuzumab mafodotin is a monoclonal antibody targeting CD70, a member of CD70 tumor necrosis factor (TNF) superfamily. Vorsetuzumab mafodotin, developed by Seattle Genetics, has been used in the clinical treatment of Non-Hodgkin's lymphoma and renal cancer. This drug has completed a phase I clinical study in renal cell carcinoma but was discontinued in 2013. There were no reports specifying the reasons for the cessation of development. In 2014, SG had planned to reopen clinical studies related to vorsetuzumab mafodotin.

稳定性和储存

The stability of ELISA kit is determined by the loss rate of activity. The loss rate of this kit is less than 10% prior to the expiration date under appropriate storage condition.

运输条件

2-8 ℃

For Research Use Only.
