伊那鲁单抗ELISA检测试剂盒

Ianalumab ELISA Kit

货号：RB9T37017368

在您使用本产品前请认真阅读说明书，这对您顺利完成实验很有帮助。

产品编码
RB9T37017368

中文名称
伊那鲁单抗ELISA检测试剂盒

英文名称
Ianalumab ELISA Kit

应用
ELISA

登录号
Q96RJ3

靶标
伊那鲁单抗酶联免疫检测试剂盒

检测方法
Colorimetric

灵敏度
0.156 μg/ml

检测范围
0.31-5 μg/mL

回收率
80-120%

样本类型
Plasma, Serum

检测类型
Quantitative

背景信息

Ianalumab (VAY736) is an anti-B-cell activating factor (BAFF) receptor fully human IgG1 monoclonal antibody, engineered for direct ADCC-mediated B-cell depletion, thus providing a dual mode of action and targeted approach to treat pSS. The current phase 2b study aimed at establishing a dose-response relationship over a wide range of VAY736 doses, using change from baseline (BL) in the EULAR Sjogren's Syndrome Disease Activity index (ESSDAI) over 24 Weeks (Wks) as the primary endpoint. Here we report Wk24 efficacy and safety. The study is ongoing with a second blinded treatment period up to Wk52.

别名

VAY-736, 1929549-92-7

稳定性和储存

The stability of ELISA kit is determined by the loss rate of activity. The loss rate of this kit is less than 10% prior to the expiration date under appropriate storage condition.

运输条件

2-8 ℃

For Research Use Only.
